

Salina, Kansas

## Kasa Fab Works With Wastewater Firm To Keep Production In The U.S.

Kasa Fab, Salina, Kansas, recently worked with a wastewater firm to produce its product in the U.S.

Kasa Fab worked with AeroMod, a wastewater management provider, to redevelop a product that they were buying overseas. In order for AeroMod's customers to qualify for ARRA funding, the AeroMod equipment had to be manufactured in the United States.

AeroMod turned to Kasa Fab to reverse engineer their belt press and work with the AeroMod engineers to improve the final product. Kasa Fab now manufactures the items as AeroMod continues to sell wastewater systems in the U.S. and internationally.

Kasa Fab provides mild steel, stainless steel and aluminum fabricating and finishing. It offers services such as: laser cutting, forming, Mig and Tig welding, robotic welding, sawing and liquid /powder painting.

"One of the unique features of Kasa Fab is that we can go from a napkin design to complete production. We are able to meet high capacity needs of manufacturing," stated Kasa Fab's Production Manager Mark Slubowski.

Kasa Fab provides enterprise level services, with stocking programs, ERP integration, and dedicated customer care representatives.

With more than 100,000-sq.-ft. of capacity and a variety of capabilities, the company provides piece-part fabrication and complete component manufacturing.

Equipment at the company includes: 5000-watt lasers (1" mild steel cutting capacity); shears with CNC backstop; CNC press brakes; vertical and horizontal saws; robotic welders; Mig and wire

welders; heliarc and Tig welders; and powder and liquid paint equipment with enough capacity to paint a bus.

The company serves many industries across the country including: defense; extrusion; automotive; agriculture; utility; transportation; environmental and food services.

Kasas Fab, which is ISO

certified, is a division of Kasa Companies that also includes Kasa Controls (automation, engineering & design) and Ksolutions (integration, maintenance & lean manufacturing consultants).

The firm can be contacted at: 304 East Avenue B, Salina, KS 67401; (800) 411-3692; 785-825-5612; Fax (785) 825-0336 or [www.kasafab.com](http://www.kasafab.com).
